

Förderverein der Deutschen Schafhaltung e.V. Wilhelm-Kuhr-Str. 5 13187 Berlin

To all associations and
all who have a heart for grazing animals!

Berlin, 01.07.2019

Rushfire and solidar fire in Europe 13.09.2019 Call from Switzerland!

Dear Sirs and Madames,

the Förderverein der Deutschen Schafhaltung e. V. (FDS) asks you to take part in the Europe-wide campaign "Reminder and solidarity fire" for the limited spread of wolves.

This call has reached us from Switzerland and we would be happy if you could
Action would be supported by Germano Mattei, co-Presidente ATsGP Svizzera.

This Europe-wide action is to take place on Friday, 13.09.2019 from 19.30 clock.
The first warning fire was already in Germany all with a very good response.

As the wolves are not only increasing in Germany, they are becoming a serious threat to the continued existence of welfare grazing in Europe.

Fences, shepherds and herding dogs are neither affordable nor really an alternative in the densely populated cultural landscape! That is why we want to send out a clear signal with our funeral fires and solidarity against the wolves, which our politicians throughout Europe have to exercise.

If you have the options, please organize such an action!

It is a signal to all state governments, to the federal politicians and to the EU.

We also appeal to solidarity with the previously unaffected regions. Everyone who wants to change something should join in.

Please let us know if you would like to organize such an action.

In addition, as desired, items such as films, banners, T-shirts or stickers.
