

Förderverein der Deutschen Schafhaltung e.V. Wilhelm-Kuhr-Str. 5 13187 Berlin

To all organizations and
everyone who has a heart for grazing animals!

12/11/2020

A light for a better time. "Will grazing animals still have a future in Europe?"

Dear Sirs and Madams,

the Association for the Promotion of German Sheep Farming e. V. (FDS) asks you to take part in the first Europe-wide campaign "A light for a better time".

This Europe-wide campaign is to take place once, on Saturdays (12.12 and 19.12 of the Advent season from 6 p.m. to 7 p.m.).

Since the problems with wolves are not only increasing in Germany, they are becoming a serious threat to the continued existence of appropriate grazing animals throughout Europe.

Fences, shepherds and guard dogs are neither affordable nor really an alternative in the densely populated cultural landscape! That is why we want our light to send a clear signal for a better time, which our politicians across Europe must perceive.

If you have the opportunity, please organize such an event!

It is about sending a signal to all state governments, to federal politicians and to the EU.

We also call on the regions that have not yet been affected to show solidarity. Everyone who wants to change something should join in.

Leave a light on everywhere in Europe to draw attention to our concerns and to start a conversation: the exchange of information and ideas will help us advance!

Please let us know if you want to organize such a campaign, to [wende.schaf @ outlook, de](mailto:wende.schaf@outlook.de) please include a postcode for a card that we want to create.

Sincerely yours

Wendelin Schmücker

Chairman of the Association for the Promotion of German Sheep Farming (FDS)

You can change something - every day and at any time!
